

The following recommendations by Dr. Ivan Rothman are for the use of digital camera users. Dr. Rothman is an experienced and accomplished nature photographer who has travelled worldwide.

Editing software for digital images

Breezebrower www.breezesys.com/breezebrower/

Capture One LE No need to get the expensive pro version. Also does raw conversions www.phaseone.com

Delkin Cardbus 32 Adaptor - this is an adaptor for a laptop PCMCIA slot that will download flashcards at 5x the speed of other flashcard readers. Artie Morris is selling them at his website www.birds.com

Cleaning brush for sensors on digital cameras - www.visibledust.com

See Joe McDonald's review of this product - www.hoothollow.com

Photo Back Pack from Moose Peterson. MP-1 or smaller MP-3 which also accepts a clip on laptop case. Not as well padded as usual photo backpacks, but light weight, hold a tremendous amount of gear in a configuration that is ready for field use and they fit in the overhead compartments of even the smallest commuter planes.
www.moose395.net

CD holders

C-shells (clamshell cases - very compact and sturdy)

www.digidocsystems.com

Lowepro also makes nice CD holders, different sizes, holding 10 or more CDs

Ralph Paonessa - he's was the leader of our trip, and I would enthusiastically recommend him for any of his trips. He ran a great trip, knowledgeable, energetic, helpful and just a really really nice guy. The group was small (4 including Ralph). www.rpphoto.com
